OBADA WALEED AHMAD KHADER

Information Technology Developer | Web & Mobile | AI & Cybersecurity

Amman, Jordan | LinkedIn | +962795916438 | obadakhader70@gmail.com

PROFESSIONAL PROFILE

Information Technology professional with a Pearson BTEC background in Information Technology and hands-on knowledge across web development, mobile applications, artificial intelligence, and cybersecurity. Comfortable turning ideas into practical digital solutions, learning new technologies quickly, and working across the full development lifecycle from planning and implementation to testing and improvement. Strong interest in secure software development, automation, AI-enabled solutions, and practical problem solving.

CORE TECHNICAL SKILLS

Web Development	HTML5, CSS3, JavaScript, responsive UI, front-end development, back-end concepts
Mobile Development	Flutter / Dart, cross-platform application development, iOS & Android concepts, UI implementation
Programming	Python, PHP, SQL, C++, C#, Dart; oop
AI & Automation	AI Fundamentals, AI-Assisted Software Development, Automation, Model Training Concepts, AI Interaction & Advanced Prompt Engineering
Cybersecurity	Cybersecurity fundamentals, blue-team concepts, incident management, CTF mindset, security awareness
Tools & Platforms	Git/GitHub, VS Code, Google tools, Microsoft tools, Godot Engine, databases

EDUCATION

Pearson BTEC in Information Technology | *British vocational education system* *2024-2026*

Studied IT through the Pearson BTEC framework with practical exposure to software development, digital technologies, problem solving, and applied IT projects.

PROFESSIONAL EXPERIENCE

Trainee — Teqani Educational Platform & Technomedia | Two-Month Training

Completed a two-month practical training experience in Information Technology, working across web design and development, technical support, and general IT operations.

Web Design & Development — Contributed to designing and developing websites, implementing responsive interfaces, improving usability, and supporting practical web-development tasks.

Technical Support — Assisted with troubleshooting, resolving technical issues, supporting users, and maintaining day-to-day IT functionality.

IT Operations — Gained practical exposure to general IT tasks, digital tools, problem solving, and technology-related support in a professional working environment.

SELECTED TECHNICAL PROJECTS & PRACTICAL WORK

Full-Stack Web Projects — Designed and developed responsive websites with front-end interfaces, back-end logic, databases, and API integrations, focusing on usability and maintainable structure.

Mobile Applications — Built and explored cross-platform mobile applications using Flutter/Dart, with attention to user experience, application logic, and platform compatibility.

AI-Enabled Solutions — Worked with AI concepts and tools to explore automation, intelligent features, and practical AI-assisted workflows.

Cybersecurity & CTF Practice — Developed practical security knowledge through cybersecurity training, workshops, and Capture The Flag–style problem solving, with interest in defensive and offensive security.

Game Development — Created interactive game concepts using Godot Engine, applying programming logic, game mechanics, UI, and iterative development.

SELECTED CERTIFICATIONS & TRAINING

Artificial Intelligence Fundamentals | Udacity | 2025

Introduction to Cybersecurity | Cisco Networking Academy | 02 Jul 2025

Cybersecurity Essentials for Blue Teamers | Tuned Applications Academy | 02 Mar 2026

Cybersecurity & Incident Management Workshop | IEEE Hashemite University Student Branch | 2026

AI in Network Workshop | CYS TECH | 2026

Introduction to Robotics Course | RoboX / Migrate Business Services | 19–20 Jan 2026

Microsoft Copilot Training / Workshop | Training certificate | 19 Jul 2025

AI Fluency | Microsoft | 06 Jul 2025

Professional Workshop: AI and Business Automation | FastSource | 2026

Code the Cube: How to Build a Cube Timer | Google Developer Groups on Campus – HTU | 17 Feb 2026

International Youth Day Webinar – JoYS Effect | Jordan Young Scientist | 12 Aug 2026

PROFESSIONAL STRENGTHS

- Strong technical curiosity and fast learning across multiple IT domains
- Practical, project-oriented approach to software development
- Analytical thinking and structured problem solving
- Security-aware approach to applications and digital systems
- Comfortable working independently and collaborating in technical environments
- Continuous learning through certifications, workshops, and hands-on practice

PROFESSIONAL INTERESTS

Full-Stack Development • Mobile Development • Artificial Intelligence • Cybersecurity • Secure Software Development • Automation

LANGUAGES

Arabic	fluency
English	Knowledge of professional terminology
